MACHINE	GALAXY -DOOR

WRAPPING MACHINE WITH STRETCH FILM FOR DOORS AND WINDOWS

GALAXY-DOOR

SPECIFICATIONS

Pressing arm with fork support for doors/windows

Bottom frame with fork supports for doors/windows

Pedal switch for pressing arm control

display touch screen 7" color

machine controlled by PLC

siemens frequency converters on all the motors

machine power 1,75 kw

machine supply 220-240 VAC 1 ph, 50-60 Hz

turntable diameter 1650 mm (max pallet 1200x100 mm)

max pallet weight   2100kg

Beeper on cycle start

table phase stop

height sensing with photocell

height also settable by the panel

n° 99 custom programs

upward speed adjust

downward speed adjust

speed rotation adjust

management of the film tension and percentage of pre-stretch

bottom rounds adjust

top rounds adjust

photocell delay adjust

only up cycle

only down cycle

up and down cycle

up and down cycle alternate

cycle with reinforcement at pre-set height

cycle with start at pre-set height

top sheet cycle

possibility to set a protection password on parameters

machine diagnostic by display

available wrapping heights:

   2400 = H 2400 mm   (with film coil h500 mm)

   2800 = H 2800 mm   (with film coil h500 mm)

   3200 = H 3200 mm   (with film coil h500 mm)

available film coil carriages:

   FE : electromagnetic brake and film tension adjust by control panel

   PM : power pre-stretch fix 230% (other on demand) and film tension adjust by control panel

   PMV : power pre-stretch adjustable up to 230% (other on demand). Separated adjust of tension and pre-stretch by control panel
